## 1. Introduction

1.1 The purpose of this document is to present data on the housing land supply in Bromsgrove District, which contributes towards meeting the District's housing requirement. The housing requirement for Bromsgrove District is for the construction and completion of 7000<sup>1</sup> dwellings between 1 April 2011 and 31 March 2030.

1.2 The information in this document shows the housing land supply position for Bromsgrove District at 1 April 2023. This information is used to monitor the progress of meeting the housing requirement set out in the Bromsgrove District Plan 2011-2030 (BDP), which was adopted in January 2017. Furthermore, this information will populate the Council's Authority Monitoring Report, which is published annually in December. It will also help the review of Local Plan policies and provide background information for other strategic planning documents.

1.3 Paragraph 68 of the National Planning Policy Framework<sup>2</sup> (NPPF) highlights that local planning authorities should have a clear understanding of the land available in their area. Paragraph 74 of the NPPF states that '*... local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement...*' and paragraph 76 states that '*... local planning authorities should monitor progress in building out sites which have permission...*'.

1.4 The role of housing land monitoring is to:

- Ensure the maintenance of an adequate supply of both brownfield and greenfield land for housing and to enable its managed release;
- Assess the supply of affordable housing units;
- Track the effectiveness of Local Plan policies; and
- Contribute to the District's Authority Monitoring Report and the Department for Levelling-Up, Housing and Communities housing flow returns.

1.5 The Housing Land Supply document was re-designed in the monitoring year 2018-19 to provide a more streamlined and useful document. As such, some datasets won't have historic trend data.

<sup>1</sup> As detailed in Policy BDP3 of the adopted Bromsgrove District Plan 2011-2030

<sup>2</sup> The revised National Planning Policy Framework was updated on 20 July 2021

## 2. Housing Completions

2.1 This section details the completions to date which contribute to meeting the District’s housing requirement of 7000 dwellings up to 31 March 2030. For the Plan period (2011-2030) an average of 368 net completions per annum is required to meet the District’s housing requirement. Table 1 shows the housing delivery performance to date. For details of the sites which made contributions to the 2022/23 completions, see Appendices 1 and 2.

2.2 Bromsgrove monitors the type and tenure of completions within the District every year from 1 April to 31 March in line with Policies BDP7 and BDP8. Policy BDP8 states that *“where there is a net increase of 11 or more dwellings affordable housing provision will be expected on-site and will be calculated against the net number of new dwellings as follows:*

Up to 40% affordable housing (or a higher % if proposed) on greenfield sites or any site accommodating 200 or more dwellings;

Up to 30% affordable housing (or a higher % if proposed) on brownfield sites accommodating less than 200 dwellings”

2.3 Table 2 provides details of completed dwellings within the District from the 2018/19 monitoring year onwards by tenure for the whole District. Table 3 shows gross completions by number of bedrooms provided from 2011 to 2023.

(N.B. For every year prior to 2018/19, the completed number of bedrooms do not include those dwellings on sites still under construction, hence they have been excluded from the total.)

## Brownfield/Greenfield

2.4 A core planning principle highlighted in the NPPF is to encourage the effective use of land by reusing land that has been previously developed (brownfield land), provided that it is not of high environmental value.

2.5 Paragraph 119 of the NPPF explains *'Planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions. Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously-developed or 'brownfield' land.'*

2.6 The NPPF also states at paragraph 71 that planning authorities should consider the case for setting out policies to resist inappropriate development of residential gardens, for example where development would cause harm to the local area. The glossary of the NPPF also excludes land in built-up areas such as residential gardens as being part of the definition of 'previously developed land'. As such garden land is classified as greenfield land.

2.7 Table 4 provides details of the total number of dwellings completed on brownfield and greenfield land for the period 1 April 2011 to 31 March 2023.

<sup>3</sup> Includes 4+ bedrooms

**Table 4: Total number of dwellings (Gross) completed on Brownfield and Greenfield land in monitoring years 2011/12 to 2022/23**

<b>Total</b>	<b>1248</b>	<b>2047</b>	<b>3295</b>	<b>37.88%</b>

2.8 Many completions this year occurred on a large strategic brownfield site. Additionally, this year several medium change of use schemes were completed. The Local Plan identifies further strategic development sites, some of which have not started construction, which are greenfield land, which means that in future years a smaller percentage of brownfield completions is to be expected.

## 3. Provision of Affordable Housing

3.1 The provision of sufficient and high-quality affordable housing is one of the most discussed and relevant issues within Britain today, especially given the present housing market conditions, which are precluding many people from accessing housing.

3.2 Therefore, robust monitoring of the provision of affordable housing provides local authorities with an assessment of whether or not sufficient levels of affordable housing are being provided as a response to meeting their current housing needs. Policy BDP8 in the BDP relates to affordable housing requirements within the District.

3.3 55 affordable dwellings were completed in 2022/23. This reflects the lower total completions across the District, and the smaller number of large strategic sites that are currently under construction. There are 498 affordable housing commitments as of 1 April 2023.

3.4 For the breakdown of affordable completions by tenure since 2011/12, see Table 5. For the breakdown of bed spaces for affordable dwellings from 2013/14 to 2022/23 see Table 6. Data for 2011/12 and 2012/13 on the bed spaces for affordable dwellings is unavailable.

Figure 1: Distribution of land with planning permission for housing by Parish (2022/23)

## DISTRIBUTION OF LAND WITH PLANNING PERMISSION FOR HOUSING BY PARISH (2022/23) % OF COMMITMENTS

## 5. Housing Commitments

5.1 This section details the commitments for the District. There are currently **150 dwellings under construction** (See Appendix 2) and **2142 dwellings which have not started** (See Appendices 2 and 3) which benefit from valid planning permission this monitoring year. This gives a total of **2292 net housing commitments** in BDC.

5.2 Deliverable is defined in the NPPF (2021) Glossary as:

*“To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:*

a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).

b) where a site has outline planning permission for major development, has been *allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years”*

5.3 As such, sites within Appendix 4 – Delivery Schedule, adhere to the NPPF and NPPG with regards to being deliverable sites. Evidence has been gathered for required sites to confirm that they should be included within the five year supply.

5.4 There are currently no allocated Deliverable sites within the District which have not got planning permission and can be evidenced as deliverable.

## 6. Housing Delivery Performance

6.1 The Housing Delivery Test (HDT), which was introduced in 2019, relates to the buffer element of the five year housing land supply (5YHLS) calculation and replaces the Housing Delivery Performance justification for the percentage buffer that needs to be applied. The size of the buffer to apply is set out in the NPPF (2021) at Paragraph 74 (a-c) and is reiterated in the Planning Practice Guidance. The purpose of including a buffer is to ensure choice and competition in the market for land.

6.2 At the time of publication, the 2022 HDT outcomes had not been published, therefore the 2021 HDT outcome detailed below has been used to determine the percentage buffer to be applied to the 5YHLS calculation. Based on this and the average outcome over previous years, the Council considers that it is unlikely that the application of a 20% buffer would be inappropriate.

6.3 The Council has disputed the methodology to determine the HDT outcome for Bromsgrove District in relation to how cross boundary housing need is taken into account and the impact this has had on the Bromsgrove HDT outcome. The Council will apply a 20% buffer<sup>8</sup> based on the 2017 to 2020 Housing Delivery and Housing Requirement calculation as follows:

### Calculating the Housing Requirement

## 7. Windfalls

7.1 The NPPF (paragraph 71) states *'Where an allowance is to be made for windfall sites as part of anticipated supply, there should be compelling evidence that they will provide a reliable source of supply. Any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends. Plans should consider the case for setting out policies to resist inappropriate development of residential gardens, for example where development would cause harm to the local area.'*

7.2 The Glossary (NPPF, Annex 2), defines windfall sites as *'sites not specifically identified in the development plan.'*

7.3 Windfall development is monitored as part of the Housing Land Supply process in Bromsgrove each year, and a detailed commentary and calculation method has previously been included in the 2015 SHLAA<sup>9</sup> and in previous Housing Land Supply reports.

7.4 At the examination in the Bromsgrove District Plan 2011-2030, the Inspector considered the appropriateness of the Council's windfall allowance. He finds in his Inspector's Report (December 2016), at paragraph 43 that:

***"Justification for the windfall allowance of 40 dwellings per annum, which has been increased from the figure of 30, is set out in the more up-to-date assessment of five year housing land supply, discussed below. This increase is based upon evidence of increased recent windfall rates that take account of dwellings delivered through permitted development rights – notably relating to agricultural buildings. Bearing in mind the rural nature of much of the District, a modest increase of 10 dwellings per annum in the windfall estimate appears realistic – and is well below the current rate of delivery."***

7.5 And at paragraph 44 stated ***"I am satisfied that the Council's revised assessment is robustly based."***

7.6 Therefore a **windfall allowance of 40 dwellings per annum** will be used in the 5 year housing land supply calculations.  $40 \times 4^{10}$  years = 160 dwellings – This number has been applied to the five year housing land supply.

7.7 Table 9 demonstrates windfall completions since 2002/03 and shows that the average number of windfalls in this period is 50 per annum; therefore there is confidence that this level of windfalls can be sustained.

## 8. Five Year Housing Land Supply at 1 April 2023 to 31 March 2028

8.1 The NPPF (para 74) states that local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide five years' worth of housing against their housing requirements with an additional buffer to ensure choice and competition in the market for land.

8.2 The Bromsgrove District Plan became five years old on the 25th January 2022. Based on NPPF para 74, the 5 year housing land supply is now based on the calculated Local Housing Need, not the housing requirement in the adopted Local Plan. Local Housing Need has been calculated using the Standard Method as set out in the NPPG.

8.3 Using net housing figures, the assessment below demonstrates that there is not a five year supply of housing land in the District at 1 April 2023.

		Dwellings	Average per Annum
<b>A</b>	BDC Local Housing Need based on 2014 household projections and 2022 affordability ratio		402
<b>B</b>	Requirement for 5 years (1 April 2023 to 31 March 2028) (402 x 5) + 20% buffer	2412	482 (rounded)
<b>C</b>	Net Commitments at 1 April 2023	1452	
<b>D</b>	SHLAA Deliverable Sites (1 April 2023 to 31 March 2028)	0	
<b>E</b>	Windfall Allowance (40 x 4 years)	160	
<b>F</b>	Total Supply less 5 Year Requirement (c + d + e) – b	-800	
<b>G</b>	Number of Years Supply (c + d + e) / 482	<b>3.3 years supply</b>	

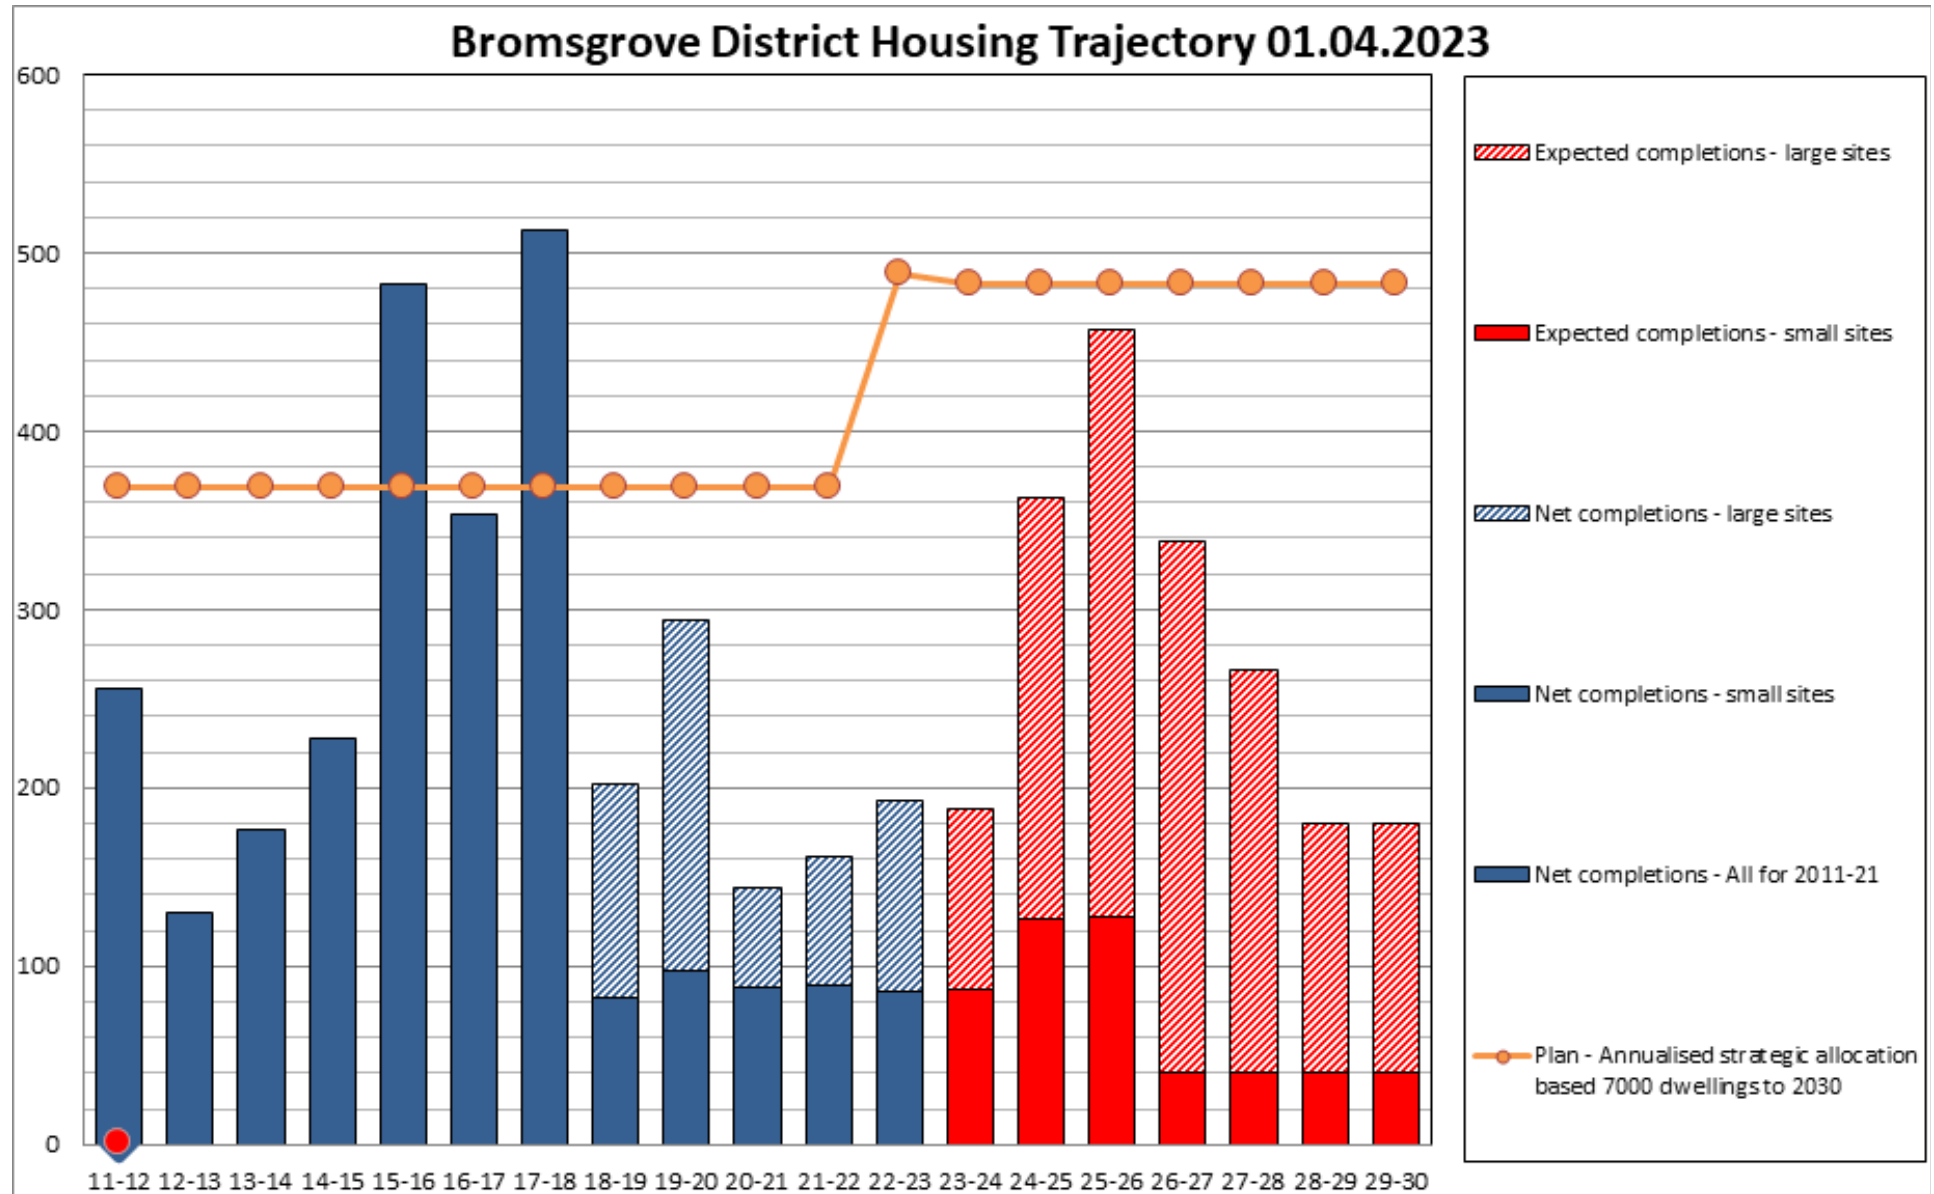

8.4 The 5 year housing land supply calculation indicates that at 1 April 2023, Bromsgrove District Council can demonstrate **3.3 years** of deliverable housing land supply for the period 1 April 2023 to 31 March 2028.
